

TRI-PREP

Concrete Etcher & Cleaner

DESCRIPTION

Tri-Prep is an organic concrete etch and cleaner used to prepare concrete floors for top coating to obtain maximum adhesion.

FEATURES

- Non-fuming
- Non-corrosive
- Phosphate free
- Contains no VOCs
- Organic salt acts like an acid

HOW TO USE

1. Thoroughly sweep entire area to be etched, removing all debris, peeling paint, or loose concrete. Spray down entire area with water.
2. Mix one-part Tri-Prep with 4 parts water.
3. Brush, mop, or flood the Tri-Prep solution on the area to be etched, making sure the Tri-Prep solution is spread evenly over the entire area. Special care should be taken in treating oil and grease stains on floors.
4. Spray etched area with water, flushing to sewer or out-of-doors.
5. Etched area should be allowed 24 hours to dry before applying primers or top coatings.

Note: Tri-Prep should not be applied to aluminum, chrome, and other decorative metals or trim. Some "stainless steels" are misnamed and can be stained. Check inconspicuous area for staining before applying.

SPECIFICATIONS

Physical Form	Liquid
Color	Clear
Odor	Mild
Specific Gravity	1.07
Flash Point (TCC)	None
